

ALSi

Advanced medical simulation *technology*

Powered by:

iSimulate

ActiveWave
Advanced Waveform Technology

Low cost & easy to use

ALSi provides an economical, highly advanced and realistic medical simulation package.

Using just two iPads, the lightness and simplicity of ALSi makes it ideal for in-situ training which provides facilitators with a great tool for training and learners an incredibly realistic platform to learn from.

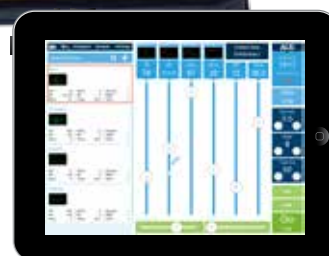

- ▶ Ultra-intuitive and feature driven
- ▶ Fully featured multi-parameter defibrillator, monitor and AED
- ▶ Turn your low fidelity situation into a high fidelity simulation
- ▶ Create and run realistic simulations quickly and easily
- ▶ Control scenarios on the fly, run them fully automated or both at the same time
- ▶ Powered by iSimulate's realistic, intricate and powerful ActiveWave technology for ECG, ETCO₂, SpO₂ and arterial trace
- ▶ Add any blood panel, image or video and send to screen
- ▶ Log and export events and comments
- ▶ Quickly create and export student reports

ALSi offers medical simulation as you've never seen it before, built off technology you use every day.

ActiveWave
Advanced Waveform Technology

The first of its kind

CTGi provides an economical, highly advanced and realistic fetal heart rate monitor simulation package.

Using just two iPads, the lightness and simplicity of CTGi makes it ideal for in-situ training. CTGi gives facilitators a great tool for training and students an incredibly realistic platform to learn from.

- ▶ World's first tablet based, real time cardiotocography simulation technology
- ▶ Powered by iSimulate's realistic, intricate and powerful ActiveWave technology
- ▶ Create and run realistic simulations quickly and easily
- ▶ Control scenarios on the fly, run them fully automated or both at the same time
- ▶ Review, annotate and teach
- ▶ Name, save and replay scenarios and traces for teaching
- ▶ Ultra-intuitive and feature driven
- ▶ Turns any low fidelity situation into a high fidelity simulation
- ▶ Use CTGi to create hours of traces.

CTGi offers obstetric simulation as you've never seen it before, built off technology you use every day.

ONLINE

**Everything
you need
*in one place***

Powered by:

iSimulate

Everything you need in one place

iSimulateOnline has been redesigned and rebuilt from the ground up, with the aim to create one place to manage everything relating your iSimulate product.

With iSimulateOnline you can not only manage your profile, but access, create and communicate with our ever expanding global community of universities, hospitals, companies and facilitators.

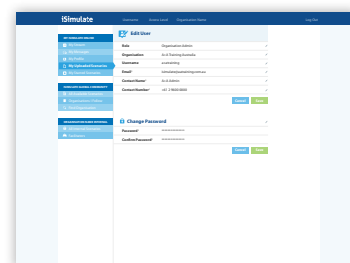

iSimulateOnline gives users access to hundreds of organisations and ever increasing numbers of scenarios, traces, discussions, answers and more.

- ▶ Manage all of your iSimulate product licences in one place
- ▶ Create new facilitator profiles, manage user details and passwords
- ▶ Access hundreds of scenarios, traces, images and more the iSimulateOnline Community through ALSi, CTGi or the web
- ▶ Easily sync scenarios, traces, images and more across your organisation
- ▶ Create a private social network for your organisation, or be part of the international network
- ▶ Share scenarios, traces, images and more internally, across devices, to your followers or publically
- ▶ Follow organisations, hospitals, companies and individuals around the world
- ▶ Create new discussions, post comments and ask questions
- ▶ Quickly search, download and use scenarios shared by your peers and users around the world
- ▶ View all posts in a single, easy to read community stream.

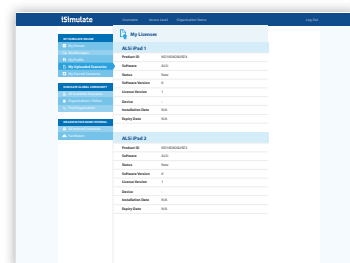

iSimulateOnline allows access to hundreds of organisations and ever increasing numbers of scenarios, traces, discussions, answers and more.

Smart, active global community

Easy organisational management

Secure license management

Big performance, incredible realism

This year we're excited to introduce **ActiveWave Technology** to our suite of medical simulation products.

ActiveWave comes as part of our commitment to ultimate simulation realism and our dedication to constantly improving our technology and product performance. ActiveWave introduces our next step in advanced waveform technology, delivering clearer, crisper and more flexible waveforms than ever before.

- ▶ ActiveWave is integrated throughout our product range
- ▶ ActiveWave produces clearer, crisper and more realistic waveforms
- ▶ ActiveWave vastly increases performance and flexibility
- ▶ Enables more realistic and intricate ECG, blood pressure, ETCO₂ and SpO₂ waveforms in ALSi
- ▶ Enables more realistic and intricate cardiocography waveforms in CTGi.

See ActiveWave in action, download the ALSi or CTGi 30 Day Trial from the iSimulate website today!!

Incredible realism

Increased intricacy

Maximum flexibility
